

# Is your software giving you a headache?

## Then join the Burgess Hodgson SaaS

At Burgess Hodgson, we're always thinking of ways to make our clients' lives easier. We know that managing software packages and vast amounts of data can be a real headache. That's why we've developed the Burgess Hodgson SaaS (Software as a Service) solution: we want to take that headache away. Using SaaS, you won't have the worry of losing your accounts data, you'll have support when things get tricky and the peace of mind that brings – all at a competitive price.

The Burgess Hodgson SaaS (Software as a Service) solution has been trialled for a number of months now with several clients. Reports from the end users are that the applications run faster for them via SaaS than when installed to their local PC. We are now in a position to roll out our SaaS solution to more of our clients. We are currently offering hosting for Sage Line50 and QuickBooks.

### **What is SaaS?**

Software as a Service is a relatively new way of delivering software to clients using 'Cloud Technology'. We publish fully secure and firewalled applications via our SSL VPN as an on demand Pay-As-You-Go service\*.

### **What are the benefits of SaaS?**

There are many benefits, including: global access to the application, no need for the latest hardware, no middleware, no complicated software installation, no backup worries, no further update or support costs and 1st class Technical Support when required.

### **What do you get?**

With our SaaS solution, you get the latest version of SAGE and QuickBooks applications. You get a secure data area; you don't need to worry about backups; you get a Citrix and Juniper Licence, but most importantly you get a cost reduction and peace of mind regarding your security.

### **What's the cost?**

Cost will depend on your existing IT set up. However, for a standard installation, we would expect the initial set up cost to be approximately £500 and thereafter a monthly cost of approximately £100 per month (with a minimum 12 month contract). But can you put a price on peace of mind?

### **Contact**

For more information, or to book a site visit, contact Andrew Miles or Greig Gaskill
